Email: moulendramouliredddy@gmail.com
Github: https://github.com/moulendra143
LinkedIn: https://www.linkedin.com/in/moulendra-reddy-1b2966335/

SKILLS:

- **Programming & Core Concepts**
  - Java
  - Data Structures and Algorithms
- **Web Development**
  - HTML
  - CSS
  - Bootstrap
  - React.js
- **Backend & Database**
  - Spring Boot
  - MySQL

SOFT SKILLS:

- Team Management
- Communication
- Collaboration
- Organizational Skills

LANGUAGES KNOWN:

- English
- Telugu

CERTIFICATIONS:

- Oracle Cloud Infrastructure AI Associate
- Java Career Track Micro-Internship
- Tata Cybersecurity Analyst Simulation
- Cisco Networking Academy Certification
- Infosys Springboard Internship Certification
- Cyber Job Simulation

AWARDS & ACHIEVEMENTS:

- Ranked 1st in Diploma (Academic Excellence)
- IEEE paper presentation – Deep Learning Disease Detection
- Project recognition – Civic Pulse Hub System
- Earned Google Cloud skill badges
- Completed Oracle Run Program

ACCOMPLISHMENTS:

- Built 3 projects in Full Stack and AI/ML
- Completed multi-domain technical internships
- Developed Civic Pulse Hub grievance system
- Built AI disease prediction system (ONNX)
- Created digital library system (500+ books)

TECHNICAL TOOLS:

- Git & GitHub
- Docker
- REST APIs
- Google Cloud

PERSONAL DETAILS:

Current Location - Nellore
Date of Birth - November 24, 2005
Gender - Male

OBJECTIVE:

- Aspiring Java Full-Stack Developer with experience in building scalable applications using Spring Boot, React, and MySQL, along with exposure to AI/ML and cloud technologies. Seeking to contribute technical expertise and problem-solving skills to build impactful software solutions in a top-tier technology organization.

EDUCATION:

N.B.K.R INSTITUTE OF SCIENCE AND TECHNOLOGY — 2024 - 2027
Bachelors of Technology in Computer Science and Engineering — CGPA: 9.1/10

GOVT POLYTECHNIC PILLARIPATTU — 2021 - 2024
Diploma (Class XII) — Percentage:9.2/10

S.V.R HIGH SCHOOL — 2020 - 2021
Secondary School (Class X) — Percentage:9.6/10

INTERNSHIPS:

Infosys Springboard | September 2025 - November 2025

- **Full Stack Development Intern**
- Developed backend modules using Java (OOP), SQL, and REST APIs to support scalable service development.
- Applied debugging and clean code practices to improve request handling efficiency.

Cisco Networking Academy | August 2025 - September 2025

- **Networking Intern**
- Configured and tested RIP and OSPF routing protocols using Cisco Packet Tracer across multiple network topologies.
- Validated TCP/IP connectivity, diagnosed routing issues, and strengthened network troubleshooting skills.

InternPro — AI/ML Intern | JULY 2025 - AUGUST 2025

- **AI/ML Intern**
- Trained machine learning models & optimized data to improve prediction performance.
- Integrated ONNX runtime inference and applied hyperparameter tuning to enhance model accuracy.

Aaviza Electronics | November 2023 - May 2024

- **Hardware Intern**
- Performed PCB wiring, soldering, testing, and assembly for electronic modules during production cycles.
- Led a 6-member execution team to streamline manufacturing workflows and improve delivery efficiency.

PROJECTS:

Early Disease Detection of Breast Cancer and Diabetes | September 2025 - October 2025 https://github.com/moulendra143/Greviances_Management

- Tech Stack: React.js | Java | ONNX Models
- Developed a medical diagnosis system using ONNX-based inference models and Java APIs for instant prediction.
- Built a lightweight and accessible screening tool for clinical decision support

Civic Pulse Hub — Smart City Grievance Management System | September 2025 - November 2025 https://github.com/moulendra143/disease_detection

- Tech Stack: React.js | Spring Boot | MySQL
- Built a scalable full-stack grievance portal with 100+ citizen complaint submissions
- Implemented real-time status tracking and secure role-based dashboards to improve issue-resolution transparency and workflow automation.

Offline digital library management system | November 2023 - February 2024 https://github.com/moulendra143/offline-digital-library-system

- Tech Stack: PHP | MySQL | HTML/CSS/JS
- Created a centralized digital resource hub with secure login and role-based access
- Implemented a searchable e-book repository containing 500+ books, enabling seamless offline access and database-driven content retrieval for students.
